

Practical Site Auditor

Duration:

One day

Group Size:

Maximum 10 learners

Who should attend?

Suitable for those intending to assess the standard of Temporary Traffic Management Operations and Installations against the applicable U.K. standards.

Course Aims:

The course aims to give learners an extensive range of questions that may be used in auditing Temporary Traffic Management suppliers along with some techniques and tricks of the trade that can help in obtaining accurate answers to these questions.

Course Objectives:

On completion of the course the learner should display and understanding of:

- National Highways Sector Scheme 12 Components
- Sector Scheme 12 Requirements
- Understanding the Temporary Traffic Management Process
- An introduction to Key Reference Documents and how these apply
- Auditing each stage of the Temporary Traffic Management process
- A short-Written Test on topics covered in the course
- Questions to raise during Sector Scheme 12 Audits
- Recording Audit Results
- The Reporting and Validation of Audit Observations

Certification:

Upon completion of the course learners will be both able and equipped to ask a wide range of requirement-based questions covering each functional element of the Temporary Traffic Management process and cross-reference their audit observations to specific requirements identified within in the applicable documents. Learners will also receive a certificate of attendance.
